24 responses

### C.5. I feel safe using the library at night.

24 responses

C.6. The library has enough computers and available photocopier.

24 responses

D. 1. What do you value most about the current library services and resources? 19 responses

Tidy!! Uhm, on a serious note, I value the respect we encourage for each while in other.

All the resources are applicable

It has a large variety of Christian/Religion books.

I think they are helpful, not just the books and computers, but also the people working in the library.

the library services are good the resources are manageable easy and helpful.

What I value most in the library is that all services are provided to students when they need help.

Library services are helpful and the resources are very useful to us students.

the services are good and the resources are great.

The way the staff members help us.

I value the books because they help me meet my needs.

The staffs are really kind and helpful. It is a quiet place to do homework and I appreciate the help the staffs give.

reading the books and go to other website

The policy of the Library

I like how easy it is to find resources. I can look it up online or just ask a nice staff member.

The sources

The books that make it much cheaper to study at the library rather than paying 100+ dollars just to rent them

The books and DVDs. I have my own computer...

D.2 What do you find least satisfactory about the current library services and resources? 18 responses

Nothing

small space

The AC...it gets too hot

The space

all the resources because all of them are helpful

We are not allowed to borrow the laptops outside of the library and the earphones.

Sometimes, the computers would be slow.

I find the space of the library very un fitting.

Least satisfactory I find about the library is that none

Need more computers.

I think they need more computers.

I do like everything that goes in the library but only that it's a small place so we need more space.

I find the computers least satisfactory because the service connection is very slow.

honestly theres nothing I find least satisfactory

Books, Time, the workers supports

The internet is not always reliable and there's no Microsoft Office.

The computers there are ancient.

D.3. If you can think of one "big idea" to improve the Library, what would it be?<sup>19 responses</sup>

make a bigger library

same one I been saying over the years, allow food or snacks area.

Extend the building

what I think will improve for the library is the computers use because some of the computers are old but we need new ones

Please allow the students to use/borrow the laptops outside of library as well.

There are students who do not have laptops for their homework when the library is closed to do homework.

I think we can improve by just continuing on what we are doing now, because I think we are doing good so far.

make the library more larger and more space tables.

bigger space and

re-arrange

add a restroom inside for public use.

My big idea is to get more space in the library.

The library should give out more laptops to use and offer more books.

Make the library bigger.

the library is a helpful place to me because I get what I needed to do my homework

Make more space in the room for students now has been increasing. And that students will have enough place to study not to procrastinate their assignments because the seats are full.

CoffeeTalk- community forums held in the library like before with the Guam Ministerial Association or other key community leaders

I think whatever we have now is good

I would greatly enjoy an area with couches, and maybe a carpet, where one could relax and read books compared to having to always sit at a desk.

New computers
